NEW HOLLAND (original & compatible)6

GRÉGOIRE (original & compatible)28

PELLENC (original & compatible)38

AN ANSWER TO A NEED

Our compatible spare parts represent a **perfectly valid alternative to the originals**. We offer reliable products, individually tested in our technical laboratory, and at very competitive prices. Our team of specialized technicians studies the **changing needs of the sector to adapt them at all times**, thus improving their performance thanks to the feedback they offer us.

We offer an **extensive range of products and services**. We are manufacturers, as white label producers, and for other companies and distributors.

Since our beginnings, **the main objective has been to obtain the same parts**, from the injection of plastic parts, to the realization of conveyor belts, machining, turning, assembly and, a long etcetera of processes.

PERFECT LOCATION

Eduardo Repuestos Agrícolas, belonging to the *Moldes y Resinas S.L.* group, began its activity in 2012 at the hands of Eduardo Royo and María Rosa Lázaro, who took the objective of **solving the discovered needs of the Spanish wine market**.

One of the factors that has favored its rapid growth is its location: Burgos, a **strategic geographical point** halfway between the Ribera del Duero and La Rioja, wine-making references. This translates into a **constant renewal and improvement in the techniques of creation, manufacture and production** of the components offered, as well as a revolutionary look at the latest techniques in the world of the vine and the olive tree.

A TEAM AT YOUR DISPOSAL

Eduardo Repuestos Agrícolas is made up of a **dynamic and decisive team**, whose main objective is customer satisfaction.

From the company's technical office, new parts and products are tested and developed to adapt to the changing pace of the sector. Along the same lines, it offers a **personalized solution design service** to meet the specific needs of individual clients.

The **wide commercial and distribution network** acquired during these years allows, from personal advice and resolution of any doubt, to the receipt of the merchandise, a process in which the different members of the team intervene.

RESPONSIBILITY AND COMMITMENT

The group seeks to achieve the **highest quality, maximum range, and maximum service**, in the shortest possible time.

Therefore, **speed, punctuality and commitment** are the pillars that sustain this company, and which are considered essential and basic when managing and shipping products on a daily basis.

The philosophy of the workers that make up *Eduardo Repuestos Agrícolas* resides in providing consumers with **greater comfort** when making their purchases, satisfying their product needs by increasing specialization, and adjusting the price. In short, what we want is to **enhance customer proximity and loyalty**.
